Skills

- html
- CSS
- JavaScript
- react framework
- Bootstrap
- JavaScript (Node.js)
- PHP
- express.js
- MySQL

Profile

I am a highly skilled System Developer with a strong track record in full-stack development, specializing in building scalable, secure, and high-performance digital solutions. With hands-on expertise in **modern frontend frameworks** such as **React.js**, **Angular**, **Bootstrap**, and **Tailwind CSS**, I craft responsive, user-centric interfaces that elevate the user experience. On the backend, I work proficiently with **Node.js**, **Express.js**, **Firebase**, and **PHP**, delivering robust logic, seamless API integrations, and real-time capabilities.

My strengths lie in **system architecture design**, **RESTful API development**, **NoSQL/SQL database management** (Firebase Firestore, MongoDB, MySQL), and **cloud integration**. I have a solid understanding of **authentication and authorization workflows**, **DevOps fundamentals**, and **version control using Git/GitHub**.

Driven by a passion for innovation, I am committed to continuous learning and staying current with evolving technologies like **TypeScript**, **Docker**, **GraphQL**, and **AI/ML integrations** to enhance project outcomes. What sets me apart is my **analytical mindset**, **attention to detail**, and ability to **transform complex requirements into efficient, scalable systems**.

I thrive in collaborative, fast-paced environments where I can contribute to **end-to-end development**, from ideation and prototyping to deployment and performance optimization. My mission is to create **impactful, user-friendly solutions** that not only meet business goals but exceed expectations.

Key Skills & Technologies:

- Frontend: React.js, Angular, Bootstrap, Tailwind CSS, HTML5, CSS3, JavaScript, TypeScript
- Backend: Node.js, Express.js, PHP, Firebase (Auth, Firestore, Realtime DB, Cloud Functions)
- Databases: MySQL, MongoDB, Firebase Firestore
- Tools & Practices: Git, GitHub, REST APIs, Postman, Docker, Agile/Scrum
- Other: Authentication systems, CI/CD basics, Payment Gateway Integration, Cloud Services (Vercel, Netlify)

Education

National Diploma in IT (Specialize Software Development)	Present
Matric	Present

Employment

Full-stack developer	Nov 2024 - Present
Capaciti

- Design & User Experience

deployment (CI/CD) pipelines to deliver frequent updates and minimize downtime.

- Built and maintained database schemas, ensuring data integrity and optimized query performance using SQL and NoSQL databases.

**Full-stack developer**

**Dec 2023 - Aug 2024**

PetroSA

- Developed and maintained scalable web applications using modern JavaScript frameworks such as React for front-end and Node.js with Express for back-end.
- Designed and implemented RESTful APIs to facilitate seamless communication between client-side and server-side components.
- Collaborated closely with cross-functional teams including UI/UX designers and product managers to ensure alignment of application features with business requirements.
- Designed and optimized database schemas and queries using both SQL and NoSQL databases to ensure data integrity and high performance.
- Implemented user authentication and authorization mechanisms using JWT and OAuth to enhance application security.
- Managed continuous integration and deployment pipelines using tools like Jenkins or GitHub Actions, ensuring efficient and reliable release cycles.

**Full stack developer**

**Jan 2023 - Dec 2023**

Walter Sisulu University, East London

- Developed and maintained scalable web applications using JavaScript, React, Node.js, and Express to deliver seamless user experiences.
- Implemented RESTful APIs and integrated third-party services to extend application capabilities.
- Collaborated with cross-functional teams including designers, product managers, and fellow developers to achieve project goals.
- Conducted thorough code reviews, testing, and debugging to ensure high software quality and reliability.
- Managed deployment processes and optimized CI/CD pipelines for efficient and reliable software releases.
- Designed and maintained database schemas, ensuring data integrity and performance using SQL and NoSQL databases.
- Developed custom middleware solutions within Node.js to streamline data processing and integration with external APIs.
